PROFILE

My story:

I'm a UX/UI centric web developer with full stack training, and a particular affinity for React.js and SASS. I'm detail oriented, I have an eye for design, and I love the constant opportunity to learn and utilize new technologies!

I started my career as a classical French Horn player and music educator for students with special needs, honing many great skills that have translated well to web development. I am currently seeking a supportive team where I can contribute and continue to grow in a positive environment. I value organization, clear communication, and thoughtful measures to promote mental and physical wellness in the workplace.

TECHNOLOGIES

- REACT | ANGULAR
- HTML | CSS | SCSS
- BOOTSTRAP | UI KIT
- JAVASCRIPT | JQUERY
- NODE | EXPRESS
- MYSQL | SEQUELIZE

EXPERIENCE

IT DEVELOPMENT SPECIALIST II

Brightstar Corporation | Alpharetta, GA
MARCH 2021 - PRESENT

I build and manage updates to the responsive desktop User Interface for Brightstar's mobile device protection services. Our global enterprise websites are built around two main user flows, and are branded and tailored for each client.

WEB DEVELOPER

Freelance | Atlanta, GA
AUGUST 2018 - PRESENT

I design and build engaging websites for individuals and organizations to create a customized, interactive user experience.

ORCHESTRAL MUSICIAN

Greenville Symphony | Greenville, SC
SEPTEMBER 2006 - PRESENT

I serve as the Principal 2nd Horn, and I participate in Greenville's nationally acclaimed educational programs designed to culturally enrich the audiences and musicians of tomorrow.
